WORK EXPERIENCE

SENIOR JAVASCRIPT ENGINEER @ SPOTAHOME

Febraury 2019 - Currently

Real-state startup. High-talented team and challenging place. Distributed system in frontend based on Docker containers and Kubernetes infra based on a backend-for-frontend architecture. ESNext, JS, Node, React, GraphQL, React-Native, Jest, Testing-library, Cypress. Mentorship of the Junior and Middle engineers. Working remotely.

TECH LEAD @ XTEACH

April 2016 – Febraury 2019

Teach lead of an e-learning product based on a LAMP Cloud application. PHP7 with CakePHP and MySQL as Back technologies. HTML5, CSS3, LESS, JS and React.JS shape the Front stack. GIT as VCS. SCRUM and Kanban among Agile Development methodologies.

FULL-STACK ENGINEER @ ALISYS

August 2015 – April 2016
Full-stack engineer developing a telecomunications cloud product oriented to customer service departments. PHP + JS stack

FULL-STACK ENGINEER @ GOBERTIA

November 2014 – August 2015
J2EE and Liferay based Cloud application oriented to boards of directors. Postgres DB and Lucene search for massive storage.

FOUNDER @ BOOKIESHUNTER

October 2011 - Currently
Bookieshunter.com is the website that I created while I was in College. Here I provide Sports Betting info to the customers in order to help them to win. I have learned a lot developing and boosting this business without any investment. Thanks to this site I could pay the college and other courses to improve my skills while mixing my hobbie (american football) with my dream of having my own (small) business.

EDUCATION

COMPUTER SCIENCE @ UNIVERSITY OF OVIEDO

September 2008 – June 2013

☛ Best qualification in Thesis developing a C# product for retailers.

COURSES & CERTIFICATES

The list of courses is really large. They helped me to understand patterns, methodologies and new languages. The three courses that helped me more are: Testing by Kent C Dodds, React.JS by Wes Bos and Javascript patterns in Cal Davis University

By the other side I obtained certifications about some skills like PHP, Javascript, Agile Methodologies or Google Analytics. I also eat books, so I don't stop learning and my skillset is permanently growing.
